TJUGOTREDJE BANDETS INNEHÅLL

		Sid.
1.	Persson, L., Hardell, R. and Nilsson, S., The decay of the ground state of Dy^{165}	1– 34
2.	Hollander, J. M., Nordling, C. L. and Siegbahn, K., Some properties of the levels of $_{100}Fm^{254}$	35– 40
3.	Auleytner, J. und Lidén, B., Die Struktur der Bremsstrahlungs-Isochromaten von Silicium und Germanium	41– 48
4.	Hamilton, W. D. and Aasa, E., A search for low energy transitions in ^{131}Xe	49– 56
5.	Karras, M., Andersson, G. and Nurmia, M., Search for alpha activity in neutron deficient isotopes of Pb, Tl, Hg, Pt, and Te	57– 63
6.	Lundquist, N., On the electronic structure of MnB	65– 73
7.	Fahlman, A., Hörnfeldt, O. and Nordling, C., Photo electron measurements of L levels in the elements strontium ($Z = 38$) to palladium ($Z = 46$)	75– 80
8.	Brogren, G. and Hörnström, E., The X-ray reflection properties of germanium single crystals	81– 86
9.	Brogren, G., The anomalous X-ray transparency of thick germanium crystals	87– 95
10.	Blomberg, C., On quantum field theory methods in the theory of thermal properties of metals	97–116
11.	Toresson, Y. G. and Edlén, B., The $1s2s\,^1S$ level of Li^+	117–118
12.	Johansson, L., The spectrum of the neutral beryllium atom	119–128
13.	Selberg, H. L., The dependence of the detonation velocity on the shape of the front at initiation to normal or supernormal level	129–136
14.	Nagel, B., Olsson, P. and Weissglas, P., Certain recurrence relations for Appell functions useful in the calculation of matrix elements in an angular momentum representation	137–143
15.	Hagström, S., Hörnfeldt, O., Nordling, C. and Siegbahn, K., The photo electron method of determining h/e	145–153
16.	Hörnfeldt, O., Fahlman, A. and Nordling, C., Auger spectra in the intermediate coupling region	155–163
17.	Auleytner, J. and Hörnfeldt, O., Investigation of the Fermi level position in doped silicon and n-CdTe using electron spectroscopy	165–170
18.	Ryde, H., Persson, L. and Oelsner-Ryde, K., The electron capture decay of Er^{165}	171–186
19.	Alfvén, H. and Klein, O., Matter-antimatter annihilation and cosmology	187–194
20.	Ryde, H., Persson, L. and Oelsner-Ryde, K., Levels in Tb^{159} populated in the decay of Dy^{159}	195–217
21.	Brogren, G., Investigations into the widths of some X-ray emission lines	219–228
22.	Persson, A., Heat of combustion and burning rate of blasting gelatine at pressures between 1 and 11 kp/cm^2	229–234
23.	Hörnfeldt, O., The Z-dependence of energies and relative intensities in the K–LL Auger spectrum	235–245

24. Ryde, H., Search for the two-photon decay of the 1.76 MeV 0+ level in Zr^{90} 247–258
25. Pilkuhn, H., Theoretical studies in antinucleon annihilation structures 259–271
26. Noreland, E., The X-ray *L*-absorption spectrum of 46 Pd 273–281
27. El-Nesr, M. S., Grabowski, Z. and Bashandy, E., Gamma–gamma directional correlation in W^{182} 283–289
28. Rachman, A., Analysis of the microwave spectrum of meta-fluoro-chloro benzene 291–299
29. Arnell, S. E. and Wernbom, E., Resonance energies for proton capture in Ne^{21} and Ne^{22} 301–306
30. Uhlhorn, U., Representation of symmetry transformations in quantum mechanics 307–340
31. Lindskog, J., Sundström, T. and Sparrman, P., Experimental studies of the electromagnetic transitions from the first excited states in Hf^{177}, Lu^{175}, and Lu^{177} 341–354
32. Wirhed, B. and Herrlander, C. J., On the decay of Pb^{200} 355–366
33. Yngström, S., Observation of moving light-sources and objects 367–374
34. Kjöllerström, B., Calculation of some Slater integrals for argon II with wave functions based on the Thomas-Fermi-Dirac statistical model for the atom 375–384
35. Eriksson, H. A. S., On an attempt to reduce the number of basic constants in elementary particle physics by introducing pseudoscalar parameters. Part I. The mass spectrum of fermions 385–402
36. Lindgren, E. R., Liquid flow in tubes. VII. Momentum perturbation and breakdown of steady flow in relation to wall roughness 403–409
37. Pilkuhn, H., Heavy mesons in antinucleon annihilation 411–415
38. Bergqvist, I., Gamma rays from the capture of fast neutrons in U^{238} . . 417–423
39. Bergqvist, I., Fast neutron radiative capture cross sections in Ag, Ta, W, Au, Hg and U 425–434
40. Bergqvist, I. and Starfelt, N., Gamma-ray spectra from the capture of fast neutrons in Ni and Cu 435–446
41. Wilhelmsson, H., The scattering of an electromagnetic wave by a dielectric-coated metallic cylinder 447–460
42. Larsson, T. and Neuhaus, H., On the band spectrum of TlH 461–469
43. Pilkuhn, H., Perturbation theory of antinucleon annihilation 471–477
44. Kristiansson, K., Mathiesen, O. and Stenman, A., The relative abundance of nuclei heavier than lithium in primary cosmic radiation . . . 479–504
45. Han, K. S., Pancholi, S. C. and Grunditz, Y., On the transitions from the excited levels of Re^{187} 505–513
46. Helmer, J., On the theory of microwave resonance in a hot plasma column 515–526
47. Eriksson, K. B. S. and Isberg, H. B. S., The spectrum of atomic aluminium, Al I 527–542
48. Bergström, J., Holmberg, S. and Lehnert, B., Momentum balance of a rotating plasma 543–569
49. Herlitz, S. I., A method for computing the emission distribution in cylindrical light sources 571–574
